SALUSTIANO T. JIMENEZ, CESO v1

Asst. Regional Director
School Division Superintendent
Department of Education
Division of Negros Oriental

ATTENTION: Mrs. Emma Mate

Dear Mr. Jimenez,

Good day!

Rabies is a zoonotic and human infection caused by Lyssa virus, usually occurring following a transdermal bite or scratch by an infected animal. Rabies remains to be a public health problem especially among children with a highest case of animal bites. It is the most acutely fatal infectious disease responsible for the deaths of 200-300 Filipinos every year.

The Provincial Health Office in coordination with the Department of Health and Provincial Veterinary Office will be conducting an orientation/training on rabies among school nurses, teachers and the likes on **September 14 and 15 (2 batches), 8:00 a.m. at Plaza Maria Luisa**. The objective of this orientation/training is to have effective and efficient management on rabies exposure toward eventual reduction and ultimately elimination of human rabies.

In this connection, may we invite **Mrs. Emma Mate** to be our guest speaker on the said activity.

We look forward to your active participation and support.

Thank you very much.

Very truly yours,

Liland Zoila B. Estacion, BSN, RN, MD
Asst. Provincial Health Officer
